

December 28, 2022

To Whom It May Concern:

My name is Diane Lobsiger-Braden. I am a Professor at Delta College. I am also the coordinator for the Electrician and Mechatronics programs at the college. Chad Nestell was a student in my EET235 Electrical Circuits class in Fall 2022. Even though this is the only class where I have had Chad as a student, I am confident that Chad will be an asset as an employee in your company. Chad was an outstanding student as exemplified by his grade that he earned in this class. In addition to his achievement level, Chad has shown me many attributes that make me feel confident that he would be an asset to your facility.

EET235 is a class that is intended for students who are not in the electrical field of study. The intent of the class is to teach the students a wide variety of electrical components, circuits, and laws that apply to the field of electrical work in industry. The course covers DC circuits and the use of a digital multimeter, AC circuits and the use of an oscilloscope, transformers, motors, conventional control circuits, and PLCs. Chad showed an interest in the material and always participated in class sessions. His grades were outstanding in the course and I am confident that Chad has learned the materials in a manner that will allow him to be successful in the field. Chad is a very responsible individual as shown by his attendance record. In addition, he was always prepared for class and arrived early for class on a consistent basis. His assignments were always performed in a very professional manner and completed on time. Chad is the type of student who shows a genuine interest in learning the material. He was always willing to participate in class discussions and he asks very relevant questions.

Although I have only known Chad for a short time, I am very confident that he will succeed in anything he sets out to do. He is a responsible, hard-working, and respectful individual with a positive attitude. I am confident that he will be an asset as an employee of your company. If you have any questions, please feel free to contact me.

Sincerely,

Diane Lobsiger-Braden
