To Whom It May Concern:

My name is Scott Housey and I am an adjunct instructor at Delta College. I also hold a full-time position as a CNC Programmer/operator.

The class, SKCA/CAD 120, uses Mastercam software to create geometry and apply toolpaths to geometry and output machine code to create parts on CNC machines.

Last semester I had the opportunity of instructing Chad Nestell in my Intro to CAM course at Delta. He grasped the concepts and procedures well and interacted positively in class. His understanding of programming impressed me and he had later informed me that he had experience in manually inputting code into cnc machines to produce parts. He's intelligent, adaptive, respectful, and also motivated to embrace new methods and concepts. I feel he will grow the skills he has learned in Mastercam and be an asset to the organization while onboarding the program as well as a solid investment in growing the company's future capabilities.

Sincerely,

Scott Housey
